

Steps to put on personal protective equipment (PPE)

1 Always put on essential required PPE when handling either a suspected, probable or confirmed case of viral haemorrhagic fever.

2 The dressing and undressing of PPE should be supervised by another trained member of the team.

3 Gather all the necessary items of PPE beforehand. Put on the scrub suit in the changing room.

4 Put on rubber boots. If not available, make sure you have closed, puncture and fluid resistant shoes and put on overshoes.

OR, IF BOOTS UNAVAILABLE

5 Place the impermeable gown over the scrubs.

6 Put on face protection:

6a Put on a medical mask.

6b Put on goggles or a face shield.

7 If available, put a head cover on at this time.

8 Perform hand hygiene.

9 Put on gloves* (over cuff).

10 If an impermeable gown is not available, place waterproof apron over gown.

While wearing PPE:

- Avoid touching or adjusting PPE
- Change gloves between patients
- Remove gloves if they become torn or damaged
- Perform hand hygiene before putting on new gloves

* Use **double gloves** if any strenuous activity (e.g. carrying a patient or handling a dead body) or tasks in which contact with blood and body fluids are anticipated. Use **heavy duty/rubber gloves** for environmental cleaning and waste management.

Steps to remove personal protective equipment (PPE)

- 1** Remove waterproof apron and dispose of safely. If the apron is to be reused, place it in a container with disinfectant.

- 2** If wearing overshoes, remove them with your gloves still on (If wearing rubber boots, see step 4).

- 3** Remove gown and gloves and roll inside-out and dispose of safely.

- 4** If wearing rubber boots, remove them (ideally using the boot remover) without touching them with your hands. Place them in a container with disinfectant.

- 5** Perform hand hygiene.

- 6** If wearing a head cover, remove it now (from behind the head).

- 7** Remove face protection:
7a Remove face shield or goggles (from behind the head). Place eye protection in a separate container for reprocessing.

- 7b** Remove mask from behind the head. When removing mask, untie the bottom string first and the top string next.

- 8** Perform hand hygiene.
